

PBI

Pacific Biomarkers

The Value of Expertise

THE VALUE OF

Expertise

Pacific Biomarkers, Inc. is a premier biomarker laboratory services provider in the Drug Development Industry supporting preclinical and Phase I-IV studies. Since 1989, PBI has partnered with the Pharmaceutical, Biotech and Diagnostic Manufacturing Industries to provide biomarker laboratory services. Due to these partnerships and our dedicated clinical chemists we have optimized study outcomes, decreased sponsors' timelines for FDA approval, and provided competitive product differentiation.

PBI is on the leading edge of innovation providing sponsors with best in class testing for drug development in the following areas:

- Cardiovascular Risk
- Metabolic Diseases
- Musculoskeletal
- Inflammation (including Oncology and Neurology)
- Nutritional Health

PBI's CAP and CLIA certified infrastructure is flexible and project-based with testing performed on a study specific basis rather than a routine testing schedule. This allows us to customize each project in a highly focused manner to meet the needs of our clients. Some of the unique ways PBI optimizes a client's project are:

- Scientific consultation from protocol design through data deliverables
- Reduced sample volume requirements
- Dynamic capabilities to meet the needs of Adaptive Clinical Trials
- Collaboration with Diagnostic Manufacturers and Sponsors

PBI offers biomarker laboratory services in a GLP compliant facility in support of biotherapeutics development. These services include:

- Immunogenicity Testing
- Novel Biomarker Assay Development
- Cell Based Assays
- Multiplexing
- Technology Transfer
